

# Water Bottle Refill Stations

Custom-made, sustainable hydration solution  
- supplied by drinking water experts.

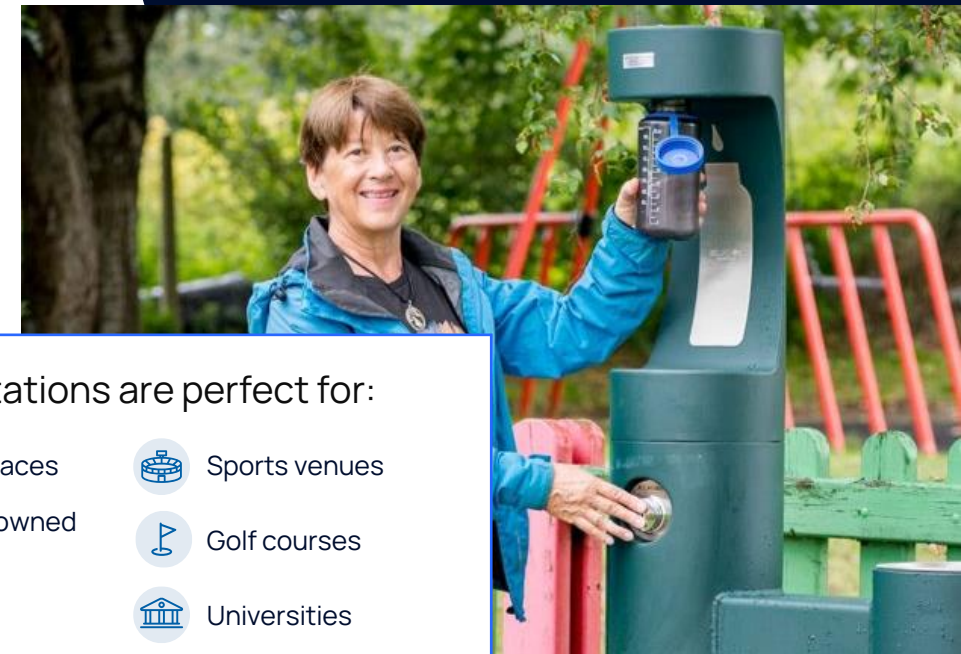

# Sustainable drinking water doesn't need to be complicated.

Designed to combat single-use plastic waste, our bottle fillers deliver safe, clean filtered water across a wide range of sectors and businesses.

Our goal is to encourage businesses across the UK to introduce a more sustainable method to providing drinking water to their customers, staff, students, and visitors; helping prevent the issue of single-use plastic waste via commercial plastic bottles.

Our bespoke bottle filling stations are a way for your business to improve its carbon footprint and help support reducing single-use plastics. Having your brand colours and logo featured on an eco-friendly dispenser ensures your sustainability message is clear whilst providing free drinking water.

## Who has introduced bottle-filling stations into their business?

## Our refill stations are perfect for:

- Public spaces
- Council-owned spaces
- Schools
- Train stations
- Sports venues
- Golf courses
- Universities
- Shopping centers

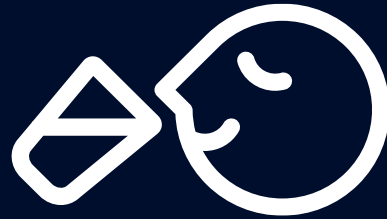

# Make a change:

100m

Estimated single-use plastic bottles saved each year.

400+

Local Refill Schemes across the UK.

72%

Carbon footprint reduction from avoiding single-use plastic bottles when using bottle-less systems.

# The British public want more fountains

- 65%** of British people have bought bottled water on the go in the last 12 months.
- 48%** of people surveyed carry their reusable water bottle when outside the home all the time or most of the time.
- 40%** of people surveyed said they bought bottled water because there are no public water fountains in their local area.
- 79%** of people surveyed would like more public water fountains to be made available in their local area:

The preferred locations for these are:

In a park (66%), on the high-street (66%),  
at a transport hub (47%), on the seafront / beach (45%),  
at a sports ground or playing field (42%).

# Indoor Bottle Filling Stations

Our Indoor Bottle Filling Stations are a stylish, efficient, and eco-friendly solution to providing drinking water; allowing for a smooth and easy filling of bottles and cups on-the-go.

With the Refill Station, you can join the modern trend of sustainability and create a unique and beautiful hydration solution for your business by helping cut down on single-use plastic water bottle waste.

This bottle filling station is available in 2 options, with choices of chilled or ambient water dispensing. This contactless model has innovative sensors to activate the water dispensing from the machine.

Add your own design: our in-house designers will help you create a fully-branded unit to fit seamlessly into your premises.

Available options:

- 💧 Non-refrigerated
- ❄️ Chilled

Programmable auto shut-off mechanism ensures that water flow stops automatically, reducing waste.

Contactless activation ensures a hygienic and convenient experience.

High-efficiency cooling system delivers cool water without wasting excess energy.

## What makes our refill stations so great?

### Bottle counter

Our bottle-counter system helps you keep track of how many plastic bottles you have saved from landfill.

### High-capacity

Efficiently serve clean water to numerous users in public spaces, supporting sustainability by reducing plastic waste.

### Cost saving

Save money and time on cleaners collecting empty plastic bottles, as our dispenser encourages use of refillable bottles.

# Outdoor Bottle Filling Stations

With wall-mounted or pedestal designs available; our outdoor bottle filling station is a great solution for offering drinking water sources in an outdoor environment.

Our refill station will fill up a standard 500ml water bottle in under seven seconds. With an easy-to-use push-button actuation mechanism and laminar flow, filling up a water bottle has never been quicker or more convenient.

Wall-mounted or freestanding designs available.

Culligan

Available options:

Non-refrigerated

Add your logo, so users know your business is supplying them with refreshing on-the-go water.

Tamper-resistant screws withstand stains and corrosion.

Corrosion-resistant material provides the ultimate protection from the elements.

Easy to use push-button dispense makes filling bottles convenient.

## What makes our refill stations so great?

### Social impact

Help the community with free water-on-the-go (reducing the need for individuals and families to buy bottled drinks).

### Cost saving

Councils will have to pay less for waste collection and management – e.g. street waste and curbside collections.

### High-capacity

Our Outdoor Bottle Filling Station fills at one gallon per minute, among the fastest on the market.

# Meetpat Bottle Refill Station

Meetpat is a versatile bottle refill station with many options to choose from; all suitable for high traffic areas in both indoor and outdoor environments.

This hybrid water station is ideal for high volume, longer and larger events.

## Models available:

- Portable
- Semi-portable
- Wall-mounted
- Permanent

Fully customizable panels allow you to brand these unit with your logo and branding of choice.

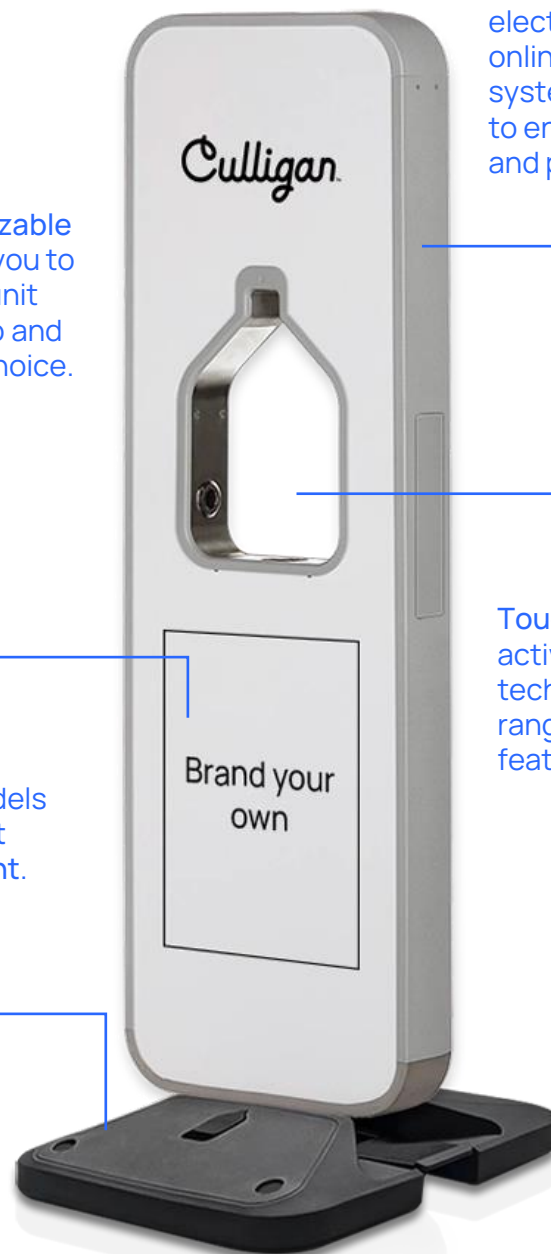

Portable or permanent models available to suit any requirement.

Available options:

- Non-refrigerated

Advanced electronics and online monitoring systems are utilised to enhance safety and performance.

Touch-free sensor activated dispense technology and a range of hygienic features.

## What makes our refill stations so great?

### Cost efficient

Meepat can be digitally monitored and provide administrative alerts for efficient maintenance scheduling.

### Safe and hygienic

This refill station meets global plumbing certification and compliance. Design features limit cross contamination.

### Flexible placement

Option of lightweight and portable units. Can also be linked with more units for larger events.

# Bespoke branding

At a small additional cost\*, we can brand up your new bottle-filling station with your logo, text and brand colours for a fully customised unit.

Whether you are looking for an indoor or outdoor bottle filling station, our team offer an easy, hassle-free way to introduce a hydration source that is designed in your brand colours with your business's logo.

Our bespoke bottle filling stations are a way for your business to improve its carbon footprint and help support reducing single-use plastics. Having your brand colours and logo featured on an eco-friendly dispenser ensures your sustainability message is clear while providing free drinking water.

## How does it work?

Our in-house designers will create a bespoke design to your brand guidelines; which will then be printed, assembled and installed by our experts.

# A handful of projects we have worked on...

Culligan™

## Commonwealth Games 2022

We supplied 216 individual bottle-filling stations resulting in over 430,000 plastic bottles saved in a week at the first carbon-neutral Commonwealth Games.

## Tate Modern #OneLess Water Fountain

The Tate Modern bottle-filling station was installed in summer 2019 without complications. In the first four months, it dispensed over 50,000 (500ml) bottle refills.

## Yorkshire Water's Cool School

Over 36 months, we installed 1,400 branded bottle filling stations across 900 sites for Yorkshire Water's Cool School campaign, benefiting 270,000 students at installation and countless more over the years.

## Bournemouth, Christchurch & Poole

Over 19,000 plastic water bottles saved in one month alone (July 2022) as a result of people refilling at new drinking water fountains.

# • CORONATION ST. •

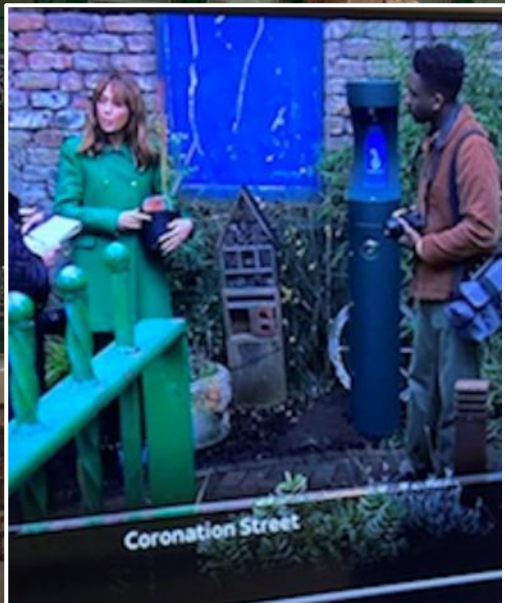

CASE STUDY **itv**

## Coronation Street Bottle Filling Station

Back in December 2018, “Plastic-Free Greater Manchester” was launched in collaboration with Refill Manchester.

A huge number of companies got involve including ITV, who approached us asking us to provide an outdoor bottle filling station for the cast and crew of the world’s longest running soap TV show; Coronation Street.

ITV wanted to encourage their staff and team to use reusable bottles instead of plastic-bottled water, so a bottle-filling station was naturally a perfect solution.

## CASE STUDY

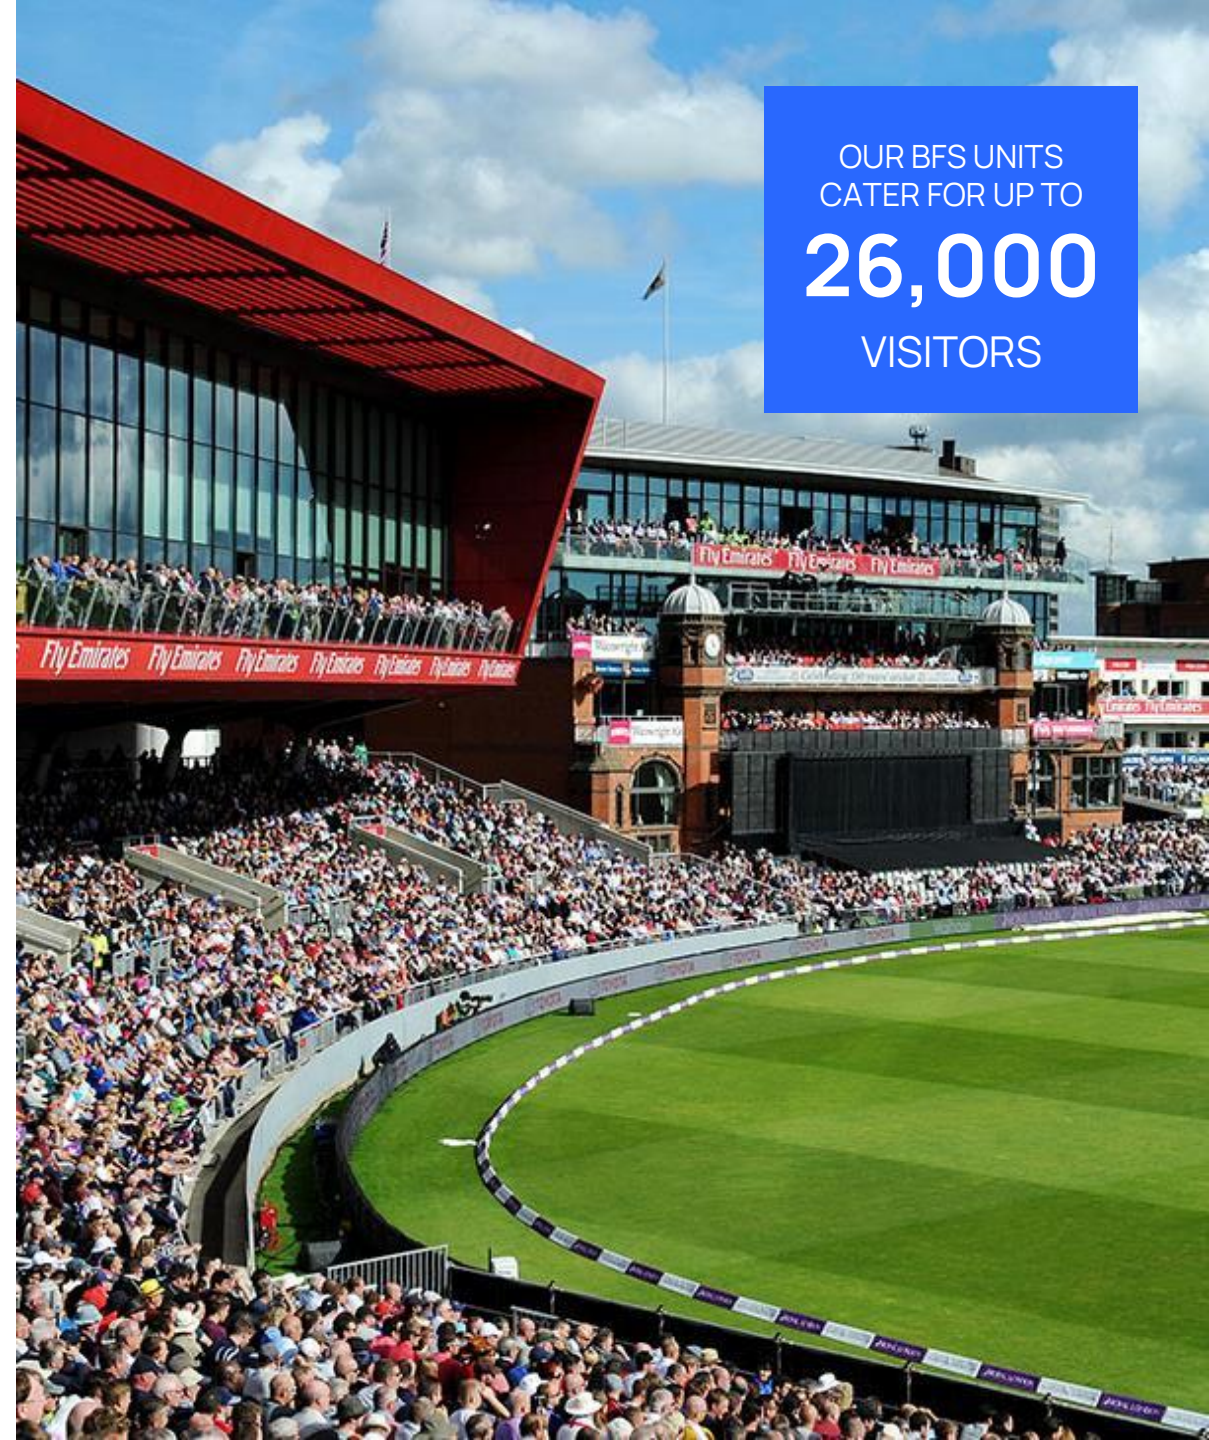

# Manchester's Old Trafford Cricket

Home of Lancashire Cricket Club – Manchester's Old Trafford Cricket takes pride in being one of the most sustainable sporting grounds in the UK. The club has taken pains to reduce the environmental impact of the grounds and made the decision to install free-to-use public bottle filling stations throughout the site.

A full service was provided to the site; beginning with an initial stage of conducting a full site assessment, meeting with strict water authority guidelines.

The bottle-fillers were then branded to Lancashire Cricket's specifications, including hand-painting and adornment with the club's livery. These stations were then installed promptly within a 1 week period, ahead of the ICC World Cup.

Our bespoke bottle-filling stations cater to the grounds' large capacity of 26,000 visitors, and we continue to sanitise and service to this day.
